

BITB

Bitwise Bitcoin ETF

Why Invest in BITB?

**Bitcoin Exposure in an ETF Wrapper:** BITB allows investors to gain convenient, low-cost exposure to bitcoin through a professionally managed ETF. This may avoid the cost, complexity, and custody concerns of owning bitcoin directly.

**An ETF Backed by Crypto Specialists:** Our firm has managed crypto assets on behalf of financial advisors, family offices, and institutions for more than six years. We do one thing only, and that's crypto. In choosing BITB, investors gain access to a team of crypto experts with the tools, insights, and specialized experience to help them navigate the space with confidence.

**A Tool for Portfolio Diversification:** Bitcoin has distinct return patterns and historically low correlations to traditional stocks and bonds. As a result, bitcoin can offer long-term diversification and risk management benefits to an overall investment portfolio.

Growth of \$10,000 Since Inception

— As of September 30, 2024

The line graph represents the cumulative performance of a hypothetical \$10,000 investment. The returns are net of the ETF's expenses but do not reflect the payment of any brokerage commissions or brokerage costs incurred as a result of buying or selling fund shares and do not reflect the deduction of taxes to which an investor would be subject as a result of owning or selling shares of the Fund. If they did, the returns would be lower than those shown. Fund inception date was January 10, 2024.

(1) Bitwise Bitcoin ETF inception date: January 10, 2024.  
(2, 3) Index returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Bitcoin is represented by the CME CF Bitcoin Reference Rate - New York Variant (BRRNY). S&P 500 is represented by the S&P 500 Total Return Index. See glossary for index definitions.

Performance of one year or less is not annualized. NAV and Index performance are calculated based on the official closing values as of 4:00 p.m. ET. Market Price performance reflects the midpoint of the bid-ask spread as of 4:00 p.m. ET, and does not represent the returns an investor would receive if shares were traded at other times. Fund returns are calculated net of expenses. Shares are subject to a 0.20% management fee that includes the custody charges for holding the Fund's assets charged by the custodian, as well as customary fees and expenses of the fund administrator and auditor. For a six-month period commencing on the day the Shares are initially listed on the Exchange, the Sponsor has agreed to waive the entire Sponsor Fee on the first \$1 billion of Trust assets.

The performance quoted represents past performance and does not guarantee future results. Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-866-880-7228.

Investment Strategy

The Fund's principal investment strategy is to invest directly in bitcoin (BTC). The Fund enables investors to gain exposure to the price movement of BTC through a conventional investment vehicle while seeking to minimize administrative costs. The Fund's bitcoin is held with one of the world's leading crypto asset custodians.

The Fund is not suitable for all investors. An investment in the Fund is subject to a high degree of risk, has the potential for significant volatility, and could result in significant or complete loss of investment. The Fund is not an investment company registered under the Investment Company Act of 1940 (the "1940 Act"). As a result, shareholders do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act.

Risks and Important Information

**This material must be preceded or accompanied by a prospectus. Please read the prospectus carefully before investing. To obtain a current prospectus visit [bitbtf.com/prospectus](http://bitbtf.com/prospectus).**

The Bitwise Bitcoin ETF (BITB) (the "Fund") is not an investment company registered under the Investment Company Act of 1940 (the "1940 Act") and is not subject to regulation under the Commodity Exchange Act of 1936 (the "CEA"). As a result, shareholders of BITB do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The NAV may not always correspond to the market price of bitcoin and, as a result, Creation Units may be created or redeemed at a value that is different from the market price of the Shares. Authorized Participants' buying and selling activity associated with the creation and redemption of Creation Units may adversely affect an investment in the Shares.

The amount of bitcoin represented by a Share will continue to be reduced during the life of the Fund due to the transfer of the Fund's bitcoin to pay for the Sponsor's management fee, and to pay for litigation expenses or other extraordinary expenses. This dynamic will occur irrespective of whether the trading price of the Shares rises or falls in response to changes in the price of bitcoin.

There is no guarantee or assurance that the Fund's methodology will result in the Fund achieving positive investment returns or outperforming other investment products.

Investors may choose to use the Fund as a means of investing indirectly in bitcoin. Because the value of the Shares is correlated with the value of the bitcoin held by the Fund, it is important to understand the investment attributes of, and the market for, bitcoin.

**Bitcoin Risk.** There are significant risks and hazards inherent in the bitcoin market that may cause the price of bitcoin to fluctuate widely. The Fund's bitcoin may be subject to loss, damage, theft or restriction on access. Investors considering a purchase of Shares

should carefully consider how much of their total assets should be exposed to the bitcoin market, and should fully understand, be willing to assume, and have the financial resources necessary to withstand the risks involved in the Fund's investment strategy.

**Liquidity Risk.** The market for bitcoin is still developing and may be subject to periods of illiquidity. During such times it may be difficult or impossible to buy or sell a position at the desired price. Possible illiquid markets may exacerbate losses or increase the variability between the Fund's NAV and its market price. The lack of active trading markets for the Shares may result in losses on investors' investments at the time of disposition of Shares.

**Regulatory Risk.** Future and current regulations by a U.S. or foreign government or quasi-governmental agency could have an adverse effect on an investment in the Fund.

**Blockchain Technology Risk.** Certain of the Fund's investments may be subject to the risks associated with investing in blockchain technology. The risks associated with blockchain technology may not fully emerge until the technology is widely used. Blockchain systems could be vulnerable to fraud, particularly if a significant minority of participants colluded to defraud the rest. Because blockchain technology systems may operate across many national boundaries and regulatory jurisdictions, it is possible that blockchain technology may be subject to widespread and inconsistent regulation.

**Nondiversification Risk.** The Fund is nondiversified and may hold a smaller number of portfolio securities than many other products. To the extent the Fund invests in a relatively small number of issuers, a decline in the market value of a particular security held by the Fund may affect its value more than if it invested in a larger number of issuers.

**Recency Risk.** The Fund is recently organized, giving prospective investors a limited track record on which to base their investment decision. If the Fund is not profitable, the Fund may terminate and liquidate at a time that is disadvantageous to Shareholders.

Bitwise Investment Advisers, LLC serves as the sponsor of the Fund. Foreside Fund Services, LLC serves as the Marketing Agent for BITB, and is not affiliated with Bitwise Investment Advisers, LLC, Bitwise, or any of its affiliates.
